

Locus Energy Announces Strategic Partnership with Ten K Solar

Provides rapid, seamless migration to the Locus platform without hardware changes or service disruptions

July 8, 2016, Hoboken, NJ & Minneapolis, MN – Locus Energy, a leading solar data and analytics platform provider, and Ten K Solar, the company maximizing value in commercial rooftop solar, today announced a partnership that makes Locus’ broad and scalable solar fleet management solutions and Virtual Irradiance available to current and future Ten K customers.

The partnership enables Ten K customers to upgrade their entire fleet of PV systems to SolarNOC™, Locus’ best-in-class asset management platform. SolarNOC is a cloud-based application that provides installers and fleet managers the tools they need optimize fleet performance remotely. SolarNOC’s monitoring and analytic capabilities bring added value to the operation and maintenance (O&M), customer service, and marketing efforts of solar EPC’s and integrators through a consolidated interface that provides real-time energy and weather data, system alerts, and performance trends.

Through this partnership, customers will enjoy rapid, cost-effective, seamless migration to the Locus platform, without disruption to service or the need to make hardware changes. “Locus Energy is pleased to be able to offer our software solar monitoring solutions to Ten K’s growing customer base, without the disruption and inconvenience typically experienced with a monitoring and analytics migration,” said Michael Herzig, CEO of Locus Energy.

With every Ten K advancement, the two companies will look to offer further benefits through the partnership. “We’re confident that this partnership will continue to evolve to offer the best solutions available to the commercial PV community,” Herzig explained.

“Ten K Solar delivers a highly productive, reliable and safe system for commercial rooftop applications. With Ten K’s significant growth, the increased size and number of projects demand the kind of scalable information system that Locus provides. We are excited to welcome Locus to the Ten K Alliance,” said Jeff Hohn, CEO of Ten K.

Locus Energy and Ten K Solar will be exhibiting at Intersolar North America in San Francisco, CA, from July 12-14, 2016. Visit Locus at Booth 8633 and Ten K Solar at Booth 7344 to learn more about this partnership.

About Locus Energy

Locus Energy is a solar monitoring and data analytics platform provider for the solar photovoltaic (PV) market spanning the residential, commercial, and utility sectors, with over 110,000 systems deployed across 2.9 GWdc in North America. Locus Energy's cloud-based application aggregates, organizes, and analyzes performance data from multiple sources, making it easier to access, manage, and identify the causes of a solar system's failure to meet performance expectations. With a deep intellectual property portfolio, Locus Energy provides many of the largest utilities, capital providers, equipment manufacturers, and asset managers with sophisticated tools to track performance across large portfolios of solar installations. Locus Energy's corporate headquarters are in Hoboken, NJ, and its technology headquarters are in San Francisco, CA. Locus Energy is an affiliate of Genscape, a premier global commodity and energy information Services Company. For more information on Locus Energy, please visit: www.locusenergy.com

About Ten K Solar

Ten K produces advanced photovoltaic modules designed for maximum performance. Based on its proprietary technology, Ten K offers high efficiency and highly reliable photovoltaic solutions for commercial rooftops, carports and ground-mount applications. With over 500 installations in the U.S. and 18 other countries, Ten K is one of the fastest growing solar providers in the world. Founded in 2008, Ten K Solar is headquartered in Minneapolis, MN.
